

SOFTWARE DEVELOPMENT EXPERIENCE

Bitsight, Boston, MA – Software Development Engineer (US Remote) 11/2022 – 02/2025

- Owned and engineered the CIDR refresh system, increasing update robustness by 50%+.
- Engineered Python microservices on AWS, containerizing data processing workflows via RESTful APIs for high-scale consumption. Developed and optimized React-based integrations for internal APIs.
- Contributed to backend services, production data pipelines, and AI system infrastructure. Expanded backend test coverage by implementing automated unit and integration tests across production.
- Optimized application uptime by monitoring EC2 health, identifying root causes, and diagnosing and resolving production failures using tools including Grafana, Sumo Logic, and Boto3.
- Migrated and maintained step-by-step Jenkins release process to GitLab CI/CD pipeline, accelerating time-to-production.

Philips Healthcare, Bothell, WA – Software Development Test Engineer 06/2019 – 03/2022

- Automated a previously 100% manual log-triaging process via custom Python scripts, saving 10+ engineering hours per week on average.
- Designed and implemented automation tests and a testing framework using C# (.NET Framework) to streamline the QA processes, ensuring thorough automated validation and comprehensive coverage of both positive and negative testing scenarios.
- Engineered a dynamic internal dashboard from conception to launch, integrating backend APIs to provide high-level stakeholders with real-time visibility into pass/fail metrics and automated test development status.
- Engineered ASP.NET backend services with MySQL, optimizing complex queries and data pipelines to support scalable and high-performance data access.
- Led a team of two in triaging product defects, ensuring timely resolution of daily triage tasks.

CERTIFICATIONS

University of Washington, Certificate in Machine Learning	Issued: 09/2024
University of Washington, Certificate in Software Design & Development	Issued: 06/2018

EDUCATION

University of Washington Bothell, M.S. Computer Science & Software Engineering	09/2018 – 06/2021
University of Washington, B.S. in Electrical Engineering, Embedded Computing Systems	09/2014 – 08/2016

SKILLS

Languages: Python, Java, C/C++, C#, JavaScript, SQL, Bash, Groovy

Frameworks & Libs: Django, Flask, ReactJS, SQLAlchemy, Boto3, Keras, PyTorch, Scikit-learn, Pandas

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions

Databases: PostgreSQL, MySQL

Tools: Linux, Git, RESTful APIs, Grafana, Sumo Logic, Pytest, JUnit

PUBLICATION

[Dementia Detection using Transformer-Based Deep Learning and Natural Language Processing Models](#)

Led ML data preprocessing, data annotation, model training, evaluation, and tuning.
